

FARMA GROW

Technical Name : Organic Manure

FARMA GROW® Organic Manure Granules are a nutrient-rich and eco-friendly soil amendment formulated to improve soil fertility, enhance microbial activity, and promote healthy crop growth. The granulated form ensures easy application, uniform nutrient distribution, and sustained nutrient availability for improved crop productivity.

Parameter	Specification
Product Type	Organic Fertilizer
Form	Granules
Colour Options	Black or Dark Brown
Total Nitrogen as N, min	As per FCO standards
Total Phosphorous, min	
Total Potash as K,min	
Total of all nutrient (N + P + K) not less than	3%
Organic Carbon	As per FCO standards
Moisture (%)	Max. 25
pH	6.0 – 8.0
Bulk Density	Less than 1.6 g/cm ³
Application	Soil Application
Particle Size	2- 4 mm Round granule, 90% particle passes through 4 mm IS Sieve

Key Features

- Rich source of organic matter and essential nutrients.
- Improves soil structure and water-holding capacity.
- Encourages beneficial microbial activity.
- Provides slow and sustained nutrient release.
- Suitable for all soil types and crops.
- Enhances nutrient uptake efficiency.
- Environment-friendly and safe for long-term use

Benefits

- Promotes healthy root development and vigorous plant growth.
- Improves soil aeration and moisture retention.
- Enhances flowering, fruiting, and crop yield.
- Increases nutrient availability and soil fertility.
- Supports sustainable and organic farming practices.
- Improves overall soil health and productivity.

Method of Application

- Apply the recommended dose uniformly to the soil during land preparation or as a basal application and mix thoroughly with the soil. Irrigate after application for best results.

Suitable Crops

- FARMA GROW® Organic Manure Granules are recommended for cereals, pulses, oilseeds, cotton, maize, sugarcane, vegetables, fruits, plantation crops, horticultural crops, floriculture crops, and all other agricultural and horticultural crops.

Available Packing

FARMA GROW® Organic Manure Granules are available in 25 kg and 50 kg HDPE bags. Customized packing options are also available as per customer requirements.

Private Label & White Label Solutions Available

This product is manufactured by FARMADIL INDIA LLP and can be supplied in customized packaging for marketing under the own brand.

Dosage & Application

Apply 50–100 kg per acre for field and vegetable crops and 100–200 kg per acre for fruit, plantation, and horticultural crops. The product may be applied as a basal dose during land preparation or mixed uniformly with soil for optimum results.
